

Banda salarial 4 - PROFESIONAL 4T	Technical Advisor in climate-resilient food production
Superior/a jerárquico/a:	Project director
Sustituto/a:	-

A. Job Description

The technical professional is the regional contact person for 5 projects in South America that are financed and supported in the context of the component Resilient Food production, who:

- 1) Supports the successful implementation of the 5 projects through technical backstopping, monitoring and reporting on project activities and milestones (50%).
- 2) Facilitates the link between each project and on-going processes in EUROCLIMA+ and the sector Resilient Food Production (e.g. EUROCLIMA+ country dialogues, NDC revisions, existing GIZ projects in South America etc.) (20%).
- 3) Support the GIZ coordinator with project management tasks (30%).

En tal sentido, el o la titular del puesto desempeña las siguientes funciones:

B. Task:

- To facilitate project management tasks in support of the GIZ coordinator through close engagements with the projects and regular short support missions to the projects (approx. twice per year per project).
- To support the monitoring and evaluation of project activities, facilitating the regular update of EUROCLIMA's monitoring system and provide input to the GIZ coordinator for overall reporting to DEVCO and BMZ.
- To ensure information flow, exchange and coordination with bilateral and regional GIZ projects and programs in the South American Region (Bolivia, Ecuador, Peru, Uruguay, Argentina, Colombia, Brazil) to use synergies and avoid overlaps.
- To participate in relevant EUROCLIMA+ programme and project activities in South America (Bolivia, Ecuador, Peru, Uruguay, Argentina, Colombia, Brazil) and represent GIZ coordinator.
- To assist project implementers on the delivery of high-quality products and outputs according to the project logical framework.
- To provide technical backstopping to the projects in coordination with Expertise France and in line with the component's Technical Assistance Strategy.
- To support TA in the facilitation of visibility, learning and knowledge sharing of the projects in national and regional platforms.
- To support the involvement of the projects within the EUROCLIMA+ country dialogue process and national NDC revision cycle.

- **Qualifications, professional experience and skills**

Qualifications

- Master's level degree in agricultural sciences, environmental studies, political sciences or any other field relevant for the project.

Professional experience

- At least 5 years of professional experience in project management and project implementation as well as advisory services to different stakeholders in a similar program context.
- Sound knowledge of approaches in the adaptation of agriculture and livestock value chains to climate change.
- General understanding of NDC-related processes at the various national levels in South America.
- Good level of experience in monitoring and evaluation as well as knowledge management systems.
- Experience with mechanisms for rural finance of project is an advantage.

Other skills/ competencies

- Results-oriented in performing tasks and having attention to details.
- Demonstrated ability to translate strategic orientations into operational guidance.
- Track record of establishing partnerships and cooperation mechanisms with partners at all levels.
- Willingness to travel within the South American Region regularly (especially to Bolivia, Ecuador, Peru, Uruguay, Argentina)
- Confident in undertaking missions into rural settings.
- Strong team player with very good communication skills for liaising with stakeholders from different sectors (government, knowledge institutions, non-governmental organizations, private sector, etc.) in an intercultural setting.
- Fully fluent in Spanish and English, both spoken and written.
