

# ALIANZAS ESTRATÉGICAS SOBRE SALUD Y CAMBIO CLIMÁTICO

## Partnerships

Protecting health from climate change requires on a broad partnership that is centred on the health community, but with links to other actors. The regional and country offices of WHO provide close relationships to the health sector within member states, who are the primary defence against health impacts from climate change and variability. The programme also has long-standing collaborations with health research organizations, and with UN and other international and national agencies, that are involved in mitigating and adapting to climate change.

### Academic institutions

- [WHO Collaborating Center: Global Change and Health](#)  
London School of Tropical Medicine and Hygiene, UK.
- [WHO Collaborating Center: Early Warning Systems for Malaria and Other Climate-Sensitive Diseases](#)  
The international Research Institute for Climate and Society, Columbia University Earth Institute, USA.
- [Harvard Medical School, USA](#)  
Center for Health and the Global Environment.
- [East West Center, USA](#)
- [National Center for Epidemiology and Population health, Australia](#)  
Environmental Health Program.
- [Center for Sustainability and the Global Environment \(SAGE\)](#)  
University of Wisconsin – Madison.

### International agencies

- [United Nations Environment Programme \(UNEP\)](#)
- [World Meteorological Organization \(WMO\)](#)
- [Food and Agriculture Organization of the United Nations \(FAO\)](#)
- [Intergovernmental Panel on Climate Change \(IPCC\)](#)
- [United Nations Framework Convention on Climate Change \(UNFCCC\)](#)
- [United Nations Convention to Combat Desertification \(UNCCD\)](#)
- [Convention on Biological Diversity \(CBD\)](#)
- [Millennium Ecosystem Assessment \(MA\)](#)

## **National agencies**

- [U.S. Environmental Protection Agency \(EPA\)](#)
- [Health Canada](#)
- [Environment Canada](#)
- [UK Met Office](#)
